Description:

The representative table clock from BMCF was wonderfully crafted in Suhl around 1960 for the well-known jeweler BUCHHEIDER. Stylistically Asian inspired, with polished and matt surfaces in the assembly, protective varnished. The clock case rotates in the frame. The watch is equipped with an 8-day movement, all instruments in the frame can be opened to the side for operation. All instruments are provided with ground, original glasses. The original condition is extremely good, the piece has survived the last 50 years. A gem that adorns every watch collector's collection.
