Description:

The Cal. 1861-1852 was an in-house design and production, an automatic movement with the so-called PELATON elevator principle. At that time it was said that this elevator principle was the best automatic system produced in Switzerland! In the meantime, the manufacturer is again equipping automatic watches with movements based on the PELATON principle. The Silvermaster did it very well processed. 21'000' processed stainless steel case, silver-plated dial with Arabic numerals, gold plates, orange indices and Dauphine hands. Big seconds from the middle. Original crown with hair spring. Patek Philippe, brown, neutral leather strap with stainless steel pin buckle. Here we offer a heavily overhauled, well-passed copy from 1952!
