about this Object:

In high-quality workmanship, this monumental wardrobe with roller blinds was made in Italy. On the one hand bring the round, rotatable about the central axis on ball bearings clothes rails very good space utilization and usability, on the other hand makes the impressive height of 235 cm and the diameter of 140 cm, the cabinet to an object in the room. The processing with large ball bearings for the clothes rails and the roller blinds is excellent. This furniture can not have been produced in large quantities. The original invoice from 1990 is available, the furniture was bought in a well-known Berlin designer furniture gallery for a very high amount at that time.
