The shelving system 606, designed by Prof. Dieter Rams in 1960, is a timeless classic. Since you can buy it again today, it can be constantly expanded or adapted to changing needs. We offer the [e-mail: info@aiberlin.de](mailto:info@aiberlin.de) standing version, which is only secured against tipping over on the wall. This is made possible by aluminum profiles, which also make it possible to mount the shelf parts on both sides with bracing between the floor and ceiling. Our system is used and has good patina from 40 years of use. 3 boxes, 2 deep and 2 flat shelves with a width of 60 in matt black. The decoration on the last picture is NOT part of this offer, the price given only refers to the shelf. www.aiberlin.de
